Freedom from worry,
safe, risk free

Cyber Security & ICT Solutions

BUSINESS IMPACT ANALYSIS OF SECURITY

As more cyber threats develop that are targeted towards operational integrity and valuable information assets, it can often seem as if the organisation is under threat from an ever expanding list of sources.

Assets occur in many different forms and information contained within them can be highly valuable. It is often very important that measures are in place to protect and defend them and that they are appropriate and cost effective. We have worked closely with some of the largest companies in Europe to ensure that their information is both safe and consistently secured.

INFORMATION AND ASSET LOSS

The company's consultants are adept at identifying vulnerabilities, defining policy, and remediating the network to ensure that the organisation is safe. Using risk measurements that are appropriate to the size of the organisation and value of the assets, they are able to create a profile of the security needed by the organisation.

RISK MITIGATION

We have the experience and skills to identify and change the organisational security posture so that risks, which are always inherent, are mitigated. Innovative solutions are offered to reduce the cost of security without compromising the quality of the companies' defensive security.

OTHER SERVICES

The company has an enviable record in the security industry. It has gained cyber security experience through delivering excellence to many companies. Its cyber security portfolio is extensive and trusted. Monitoring and protecting multinational organisations that span the globe, we work with partners in new ventures developing paradigms in threat intelligence and Cyber Security to Defence, Financial, Utility, Telecoms and other Critical National Infrastructure organisations.

BUSINESS IMPACT ANALYSIS

SECURITY OPERATIONS CENTRES AND OPERATIONS

Our Security Operations Centres (SOCs) provide a flexible and comprehensive set of management and monitoring services that can be quickly tailored around an organisations' specific needs. Security services offer efficient, around-the-clock perimeter and internal security with real-time monitoring, device maintenance, event correlation, and analysis of the customer's infrastructure and critical applications to ensure the cyber threat is pro-actively managed and attacks are mitigated.

Protective monitoring

Multiple SIEMs families, deep analysis and company designed probes and one way diodes. These can monitors different levels of restricted data for commercial and defence customers.

Penetration testing

Test and advises on vulnerabilities and exposures. Digital, physical and human resources and capabilities tested. Accredited CHECK team available.

Incident response
