

## SECURITY AWARENESS AND TRAINING

Operating in the security field for many years, we have capabilities in all the major areas of security and helps organisations across Europe. With state-of-the-art Operations Centres, threat intelligence engines, software developers, and leveraging the experience hard won in the protection of some of Europe's most critical companies and organisations, we have breadth and depth of knowledge and executable expertise.

### REMAINING ON TOP OF THE CYBER STORM

We have been training internal and client organisations in cyber detection and incident response skills. Awareness of the advances in malware, deployment of exploits and cloaking technologies is an essential element in discovering existing threats that may exist in your organisation's network. Training in Advance Persistent Threat detection and Cyber Intelligence gathering is an area that we excel in.

### INFORMATION SECURITY AFFECTS EVERYONE

The line of defence lies with professional engineers to thwart potential cyber threats, but there are many

things that ordinary staff can do. Ensuring that they do not increase the likelihood of cyber infections is something that every concerned employee should consider, and have rudimentary knowledge about. The company is able to offer on-site awareness training, so that individuals know what they are required to do in their own organisations, and to maintain existing accreditation and compliance. For network and other IT staff, we are able to provide tailored and specific knowledge and mitigation techniques relating to your organisation.

### OTHER SERVICES

The company has an enviable record in the security industry. It has gained cyber security experience through delivering excellence to many companies. Its cyber security portfolio is extensive and trusted. Monitoring and protecting multinational organisations that span the globe, we work with partners in new ventures developing paradigms in threat intelligence and Cyber Security to Defence, Financial, Utility, Telecoms and other Critical National Infrastructure organisations.

# SECURITY AWARENESS

## SECURITY OPERATIONS CENTRES AND OPERATIONS

Our Security Operations Centres (SOCs) provide a flexible and comprehensive set of management and monitoring services that can be quickly tailored around an organisations' specific needs. Security services offer efficient, around-the-clock perimeter and internal security with real-time monitoring, device maintenance, event correlation, and analysis of the customer's infrastructure and critical applications to ensure the cyber threat is pro-actively managed and attacks are mitigated.

### Protective monitoring

Multiple SIEMs families, deep analysis and company designed probes and one way diodes. These can monitors different levels of restricted data for commercial and defence customers.

### Penetration testing

Test and advises on vulnerabilities and exposures. Digital, physical and human resources and capabilities tested. Accredited CHECK team available.

### Incident response
