Cyber Security & Information Assurance

IT SECURITY HEALTH CHECK AND RISK ASSESSMENT

Information security reflects the organisation it was developed in. It is the result of highly skilled people's thinking, and implementation of complex equipment. Like all components of an entity, it has to grow and adapt to fit the needs of the present.

Selex ES works in partnership with you to identify the effectiveness of information security within your organisation. Experienced consultants will analyse the level of protection that your valuable information assets really have.

Standards are developing and being adopted across the industry, and Selex ES invests in understanding the implications of standards and compliance issues, whether they are encapsulated in GPG13, ISO27001, PCI-DSS or other emerging standards.

RISK ASSESSMENT AND BREACH DETECTION

Whether you are looking to assure your information security mechanisms, or you are recovering from a security event, Selex ES can investigate and report on methods used to exploit your organisation or vulnerabilities that exist. These can then be revised to ensure integrity of the valuable assets you have hold.

REPORTS, OBSERVATIONS AND RECOMMENDATIONS

Once completed, Selex ES will generate a comprehensive report, tailored to provide the most accessible information and advice to your organisations personnel.

The report will detail in depth where the vulnerabilities of the organisation exist, the impact they could have, and advise on rectifying them. Selex ES consultants can then be made available to assist with mitigation planning, prioritising effort based on threat intelligence that Selex ES constantly updates.

OTHER SELEX ES SERVICES

Selex ES has an enviable record in the security industry. It has gained cyber security experience through delivering excellence to many companies. Its cyber security portfolio is extensive and trusted. Monitoring and protecting multinational organisations that span the globe, Selex ES works with partners in new ventures developing paradigms in threat intelligence and Cyber Security to Defence, Financial, Utility, Telecoms and other Critical National Infrastructure organisations.

SELEX ES CYBER PORTFOLIO

SECURITY OPERATIONS CENTRES AND OPERATIONS

Our Security Operations Centres (SOCs) provide a flexible and comprehensive set of management and monitoring services that can be quickly tailored around an organisations' specific needs. Security services offer efficient, around-the-clock perimeter and internal security with real-time monitoring, device maintenance, event correlation, and analysis of the customer's infrastructure and critical applications to ensure the cyber threat is pro-actively managed and attacks are mitigated.

Protective monitoring

Multiple SIEMs families, deep analysis and Selex ES designed probes and one way diodes. These can monitor different levels of restricted data for commercial and defence customers.

Penetration testing

Test and advises on vulnerabilities and exposures. Digital, physical and human resources and capabilities tested. Accredited CHECK team available.

Incident response

24/7/365 response to incidents. Highly diverse and knowledgeable people / systems. Can provide forensics, reverse engineering, lab skills.

Estate management
