

ERICA PLUS

HIGH PERFORMANCE LONG RANGE THERMAL IMAGER

Delivering high resolution and high sensitivity image clarity at all times, whatever the conditions, is at the heart of Selex ES's Electro-Optics (EO) systems. ERICA Plus is an advanced thermal imager providing high resolution passive infrared imaging for day and night scenarios, in low visibility conditions for land, air and sea operations.

The imager uses Selex ES MWIR Mercury Cadmium Telluride HAWK detector with a 16 μ m pitch coupled with our latest generation of advanced processing electronics and very narrow FOV step zoom objective.
