

THIS IS US

We are Leonardo. We work creatively and passionately to place advanced technology at the service of security and progress.

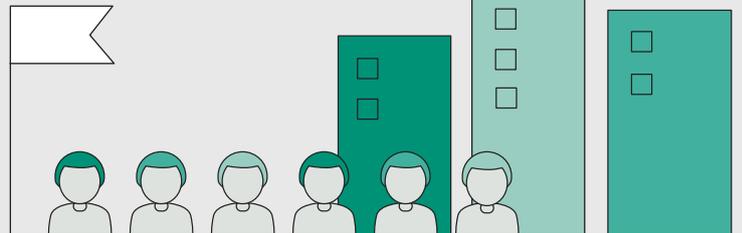

To deliver value, today and tomorrow.

A value for citizens and Institutions

We feel a strong responsibility to grow together with the countries in which we operate, with clear priorities to follow: investing in people, delivering innovative technologies, supporting our supply chain and promoting eco-efficiency in products and processes.

- **150**
countries worldwide use our products, services and solutions
- **4**
domestic markets: Italy, United Kingdom, United States, Poland
- **40**
countries in which Leonardo has a commercial presence

- **9,000**
suppliers worldwide, most of them Small and Medium-sized enterprises
- **84%**
of revenues come from international markets

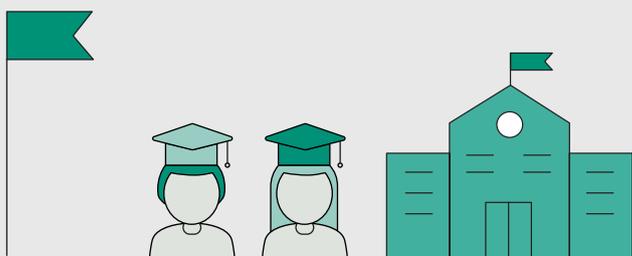

A value for science

Every day we explore new ideas, transforming them into technologies to improve our world and design our future.

- **1.5**
billion Euro spent in Research & Development
- **4th**
company in the world and 2nd in Europe in the Aerospace & Defence sector in terms of R&D investments
- **9,000**
people engaged in Research and Development
- **90**
universities and research centres with ongoing collaborations and partnerships

A value for customers

Our customers have ambitious projects. Our mission is to help them overcome their challenges, delivering our defence and security solutions. Everywhere.

- **70,000**
users protected by our cyber security services in 130 countries and over 5,000 networks
- **100**
vessels, of 47 international military navies, fitted with our naval systems
- **> 4,300**
helicopters operating in 130 countries
- **300**
airports equipped with our air traffic control systems
- **> 1,700**
ATRs sold to over 100 countries
- **> 84**
C-27J aircraft delivered to 14 countries

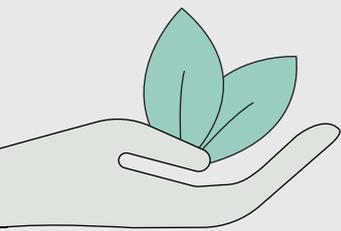

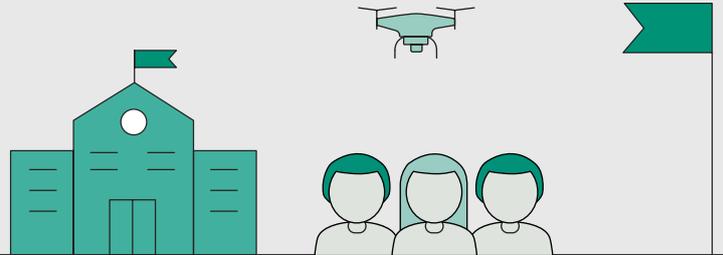

A value for future generations

We cultivate forward-looking talent, so that future generations can build the world we have only yet imagined.

- **22**
Italian universities and 5 international ones participated in our 2019 Innovation Award
- **6**
Italian universities took part in the Drone Contest to design a drone prototype using Artificial Intelligence
- **Ca. 50,000**
university and high school students reached through 69 Career Days in Italy and the United Kingdom

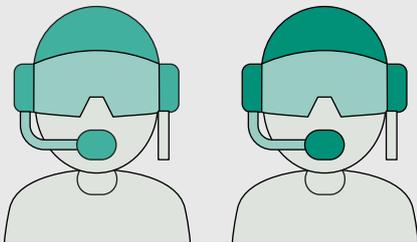

- **2,500**
training events and apprenticeships during 2017-2019
- **Thousands**
of children and youths involved in STEM events, educational workshops and contests

A value for the environment

The health of our planet is a priority. The Earth is our home and it requires our care and attention. Our technologies can make a difference.

- **> 47,000**
tons of CO₂ emissions avoided in 2019 through virtual training systems for helicopter and aircraft pilots
- **> 1 million**
radar images captured, since 2008, by COSMO-SkyMed, the satellite constellation for Earth Observation
- **> 70%**
of aircraft and helicopters in circulation manufactured with recyclable metal parts
- **10-15%**
reduction in fuel and 20% reduction in emissions, using carbon fibre to manufacture aeronautical structures
- **> 816,000**
rescue and fire-fighting missions every year in Europe with Leonardo's helicopters

We are Leonardo.

The combination of a great industrial heritage, a strong commitment to technological excellence and an ambitious vision of the future.
