COVID-19 effects on Leonardo Business

- Leonardo strategically relevant for our domestic markets

- Q1 reflecting initial impact of COVID-19 by the consequences of the measures issued by the authorities to contain the risk and protect the health of workers

- The measures taken to contain the spread of the virus and the effects of the health emergency are affecting the Group's production activities

- We reacted promptly by implementing a series of measures aimed at guaranteeing the full protection of the health and safety of people, while preserving the business continuity

- The uncertainty about the severity of the pandemic does not allow at present a quantification of the effects on the Group’s performance in 2020

- Short-term challenges do not change the Group's solid medium-long term prospects
