Lower orders YoY mainly due to tough market conditions, especially in the Oil&Gas. Key contracts include AW101 Merlin support for UK MoD.

FY revenues broadly in line, excluding the positive FOREX effect; strong profitability confirmed above 12%, benefitting from cost optimisation actions.

Notwithstanding tough market conditions in some segments, we continue to expect solid performance with a book-to-bill close to 1 and revenues in line with 2015. Profitability steadily at double digit, benefitting from efficiency initiatives and growing contribution from new models.
