Quality Policy

To sustain the mission of the Division:

*Leveraging on technological excellence, know-how and the strength of Leonardo, the Division aims to be a leader in offering solutions and services for cyber and physical security and resilience, secure communications, integrated protection of territories, critical national infrastructures and public spaces, and digital transformation of Governments and Critical Industries.*

The Division Managing Director, in order to strengthen and grow the Core Business of the Division, has established the following Quality Policy:

- Engage in pursuing excellence, through innovation, sharing of values, knowledge, and skills, involving, encouraging and enhancing internal and external resources. Working in accordance with industry best practices and standards.

- Focus on customer needs by increasing the quality of products, services and solutions, ensuring on-time delivery and customer support throughout the lifecycle of the product/service.

- Invest on innovation and continuous improvement of skills, key products and technologies.

- Continually improve the Quality Management System and business processes through monitoring and measuring effectiveness and performances.

- Increase the value to all stakeholders, developing a sustainable business able to understand and meet their requirements, respecting the environment and Leonardo values.

- Enhance suppliers and partners for mutual benefit and realization of customer requirements.

- Develop the international market, encouraging the organic and inorganic growth, the development of new technologies and technological partnerships leveraging business synergies across all segments of our market.
