

SECURITY POLICY DESIGN AND MANAGEMENT

For many years we have partnered with numerous organisations securing National Infrastructures, Defence capabilities, Financial Institutions and Commercial Companies in defending their most valuable assets.

BUILDING BLOCKS OF SUCCESSFUL SECURITY

At the core of physical and information security is the need to marry the needs of the company with the aims of the people who work in it. Security policy frameworks form the bedrock where secure management of assets starts. Organisations are shifting and changing shape all the time, and forming robust policies that withstand the changes that occur over time ensures that those assets are not exposed.

POLICY SERVICES

The company has a wealth of understanding among its consultancy community in policy design, compliance, implementation and enforcement. Working with your network and security personnel, We can audit all the policies that cover your operations.

With methods ratified through ISO 27000 standards (CLAS scheme available), the company develops the policy structures that ensure the safety of the organisations assets.

We can also assist in implementing these across the organisation and through the supply chain, ensuring compliance and advising on enforcement. By doing this you can be sure that your organisation and values are given the most up to date and specific advice available.

OTHER SERVICES

The company has an enviable record in the security industry. It has gained cyber security experience through delivering excellence to many companies. Its cyber security portfolio is extensive and trusted.

Monitoring and protecting multinational organisations that span the globe, we work with our partners in new ventures developing paradigms in threat intelligence and Cyber Security to Defence, Financial, Utility, Telecoms and other Critical National Infrastructure organisations.

SECURITY POLICY

SECURITY OPERATIONS CENTRES AND OPERATIONS
